

Language of the Gods sets out to challenge the way we see the world, our adopted belief systems and coordinates within world history. It exposes how the potential of a united humanity has been suppressed by various forms of control over thousands of years. The book is a journey of discovery into our true connection to the universe, and the relationship between the macrocosm and microcosm. The reader will come away with a fresh empowering view of how planetary cycles and energies along with human consciousness are the drivers behind geopolitical events and the ever changing fortunes of time. The book was the result of years of research into this subject. It tries to show how the control system have used deceit, fear; debt and division to keep themselves firmly at the helm while offering the rest of us an array of sophisticated techniques not only to divide us consciously but also subconsciously, perverted versions of spirituality disguised as monotheistic planet worshiping religions. I also set out to discover a correlation between consciousness, the energetic cycles of the planets and what the ancient Egyptians were trying to tell us. From a deep understanding of natural universal cycles I also wanted to know if it was possible to gain an insight into what cosmic forces will be prominent in our near future and how they will influence the geopolitical landscape.
