

Peter Kalm (1716-79) was a Finnish-Swedish botanist who travelled extensively to observe the natural world in Sweden, Finland, Russia and Ukraine, and became a professor of oeconomie, - the economic application of subjects such as mineralogy, botany, zoology and chemistry - at the university of Turku. Between 1747 and 1751 he set out on a journey through eastern North America to gather specimens, especially from regions with a similar climate to Sweden. Because Kalm travelled though the area when much of it was still unknown to Europeans, this work has some of the first recorded accounts of places such as Niagara Falls. Kalm played an important part in forging scientific links between Sweden, England and North America. This three-volume work details his travels, and was first published in English in 1770-1. Volume 1 covers Kalms Atlantic crossing, and describes the plant and animal life of Pennsylvania and New Jersey.

Voyage in Destiny - Part Five: Crop Circles and the Entry Into the Third Dimension, or the Great Transformation Man Is Facing, Solar System: Grades 1-3 (Investigating science series), Language, Meaning, Interpretation: 2 (Philosophical Problems Today), Life and Death, Raw Cookies: 60 Delicious, Gluten-Free Superfood Treats by Corbett, Julia (2014) Paperback, What a Life!: The Autobiography of PesachKe Burstein, Yiddish Matinee Idol,
